

Keeping supply chains on track.

Carlile provides seamless transportation services across Alaska, the United States and Canada. In addition to road, air and sea solutions, Carlile provides professional railroad services to connect with mainline rails in Tacoma and Alaska.

- 950 foot rail spur for loading and unloading in Tacoma
- Drive off rail ramp with 150,000 pound capacity
- Full service rail to heavy haul
- Large project lay down area
- Rail-load and off-load also available in Fairbanks, Alaska

Industrial rail spur in Tacoma, Washington

Located at 2301 Taylor Way, Tacoma, Washington 98421

Carlile's industrial rail spur in Tacoma offers standard and over-dimensional rail load and offload service to move shipments from the Port of Tacoma to mainline railroads operated by Burlington Northern Santa Fe and Union Pacific.

- Secure, inbound and outbound service
- Rail service provided by Tacoma Rail
- Open spur line accommodates up to four 89-foot cars or five 60-foot cars.
- Switching is provided once daily, six days a week
- No additional switching charges to mainline railroads

Bulk chemical transfer facility in Fairbanks, Alaska

Located at 1011 Deere Street, Fairbanks, Alaska 99701

Bulk product shipments moving in and out of Alaska by rail are transferred via the Alaska Railroad system. Rail barge service in Whittier marks the entry or departure point in Alaska and Carlile's transfer facility in Fairbanks is where shipments are transferred to highway tankers for delivery.

- Receiving and transfer of bulk chemical shipments
- Approved for handling of hazardous materials
- Secured facility

For more information about rail on and offload services, contact sales at 1-800-323-2296.
